

Theories

Although the “BIG BANG” is generally accepted as “the” theory that explains where all of this came from...it is not the only one. Your task is to find some information on other theories and creation stories.

You must find information for the organizer below for **one alternative scientific theory (besides the “Big Bang”)** and **two creation stories** of your choosing.

| Theory/Creation Story | Main Ideas | Formation of Universe | Where did Humans Come From | Age of Universe | Role of Humans |
|-----------------------|------------|-----------------------|----------------------------|-----------------|----------------|
| | | | | | |
| | | | | | |
| | | | | | |

Then answer the following:

1. How well does each theory/story fit your idea of reality?
2. Are there any similarities between the stories?
3. Why do we have the need to provide “stories” (including scientific theories) to explain our existence?

Create your organizer and answer the questions in your own document. Print it and hand it in.

Due date is:
