

Creating Classes for September - Westmount Public School

During the Spring one of the most important responsibilities our staff embark upon is the creation of classes for September. We desire to create a wonderful balance of students, taking into account everyone's strengths and overall learning needs. If you should feel inclined to advocate for the needs of your child in regards to a class placement the following process is to be followed:

1. Complete the form below describing the learning needs of your child(ren) and include what "style" of learning environment would best support their success. Eg. A creative learner, enjoys a structured environment . . .
2. At times we have found it beneficial to provide different class placements for students who have not worked well together or have had social challenges. If you would prefer that your child not be in the same class as someone else, please let us know.

Please note that parent requests for a specific Teacher(s) **will not be considered.**

Please describe your child's strengths and overall learning needs:

Name _____ Grade in September _____

Name _____ Grade in September _____

Please return this sheet to Ms. Griffiths in the Office by the end of May. Thank you.
