

Fraction WAR - Adding and Subtracting

Cut the squares to make one deck.

- This game could be used for either subtraction or addition
- Deal the entire deck
- Players flip over 2 cards from their hand at the same time
- Perform the preferred operation on the two fractions
- Whoever has the highest answer wins that round
- If the answers are the same then a WAR has incurred
- In the case of a WAR, each player lays 3 cards from their hand face down and then flips an extra 2 cards face up. Again performing the preferred operation will determine who has the highest amount. The winner of this round receives all cards on the table (including the 3 that are flipped down)
- The winner is the one who has the most cards after a set amount of time.

$\frac{1}{12}$	$\frac{2}{12}$	$\frac{3}{12}$	$\frac{4}{12}$	$\frac{5}{12}$	$\frac{6}{12}$
$\frac{1}{8}$	$\frac{2}{8}$	$\frac{3}{8}$	$\frac{4}{8}$	$\frac{5}{8}$	$\frac{6}{8}$
$\frac{1}{6}$	$\frac{2}{6}$	$\frac{3}{6}$	$\frac{4}{6}$	$\frac{5}{6}$	$\frac{7}{8}$
$\frac{1}{4}$	$\frac{2}{4}$	$\frac{3}{4}$	$\frac{1}{3}$	$\frac{2}{3}$	$\frac{2}{10}$
$\frac{1}{2}$	$\frac{3}{5}$	$\frac{4}{5}$	$\frac{2}{5}$	$\frac{8}{10}$	$\frac{4}{10}$
$\frac{7}{12}$	$\frac{8}{12}$	$\frac{9}{12}$	$\frac{10}{12}$	$\frac{11}{12}$	$\frac{5}{10}$
