

Exploring Technology

TEJ101

Grade 9, Open Level

Eco-friendly home design

What is this course about?

This exploratory course in computer technology introduces students to the design process, helps students develop an understanding of computer systems, and builds concepts and skills in graphics, computer programming, 3D design, and electronics.

What are the benefits of taking this course?

Students develop an understanding of computers and how computer skills can be applied to other fields of study. This course is an ideal introduction to computer science, digital art, computer technology, technological design, and communications courses.

Retro-style video game

Take this course if you are:

- curious about how computers work
- interested in learning to program
- creative, and you like to design things and solve problems
- planning for a future career in a computer-related area
