

MARCH 29, 2017 7-9PM FAMILY TECHNOLOGY NIGHT AT FLORADALE P.S.

How is Technology being utilized at our School?

Join us for an interactive evening centered on the technology being used at Floradale P.S. Similar to our Math Night format, some teachers will be on hand demonstrating how they use the different tools available with technology at the Primary, Junior and Intermediate levels. Our goal is to help you get a better feel for the technology being used, why it's being used and provide you with an opportunity to get hands on experience to better equip you to engage in your child's learning. The last portion of the evening we will hear a presentation from Mark Carbone, former Chief Information Officer and teacher with the WRDSB who was instrumental in the Chromebook project and the implementation of google apps for Education system wide while the children participate in interactive activities provided by our School's Leadership Team and some Grade 7/8 students.

Google what?!

How much time is
my child spending
online at school?

What is being
done to keep my
child safe online?

What benefit does
technology give to
my child?

Where is this all
heading?

SNACKS
DOOR PRIZES
COFFEE/TEA
