

Volunteer Opportunity! Online Social Media Study for Teens

FOR AGES: 13-16 YEARS

PARTICIPANTS RECEIVE:

Phase 1:  \$5 Gift Card

Phase 2:  \$5 Gift Card

Over the last few decades, teens' communication with friends has moved online. Given the potential negative consequences for teens' well-being, understanding how youth navigate social media is essential.

WHAT'S INVOLVED IN THIS STUDY?

1 In Phase 1 (45 min), participants will create Instagram posts and complete questionnaires about peers, thinking skills, mood, and their social media use.

2 In Phase 2 (30 min), participants will be asked to view posts created by other teens.

Parents will be asked to provide consent and complete a brief online demographic questionnaire

This study has been reviewed and received ethics clearance through a University of Waterloo Research Ethics Board and has been reviewed and approved by the WRDSB Research Review Committee.
