Update on Playground Improvement Project

- Had a meeting with facilities
- The small group met - how can we look at the playground holistically
 - Can we engage classes in the process?
 - The structures in the playground are already nearing the end of their lifespan (in the next 5-7

years) so the school board is happy with planning starting now

- The earliest it could physically happen would be two summers from now (Spring/summer 2025 perhaps)
