

## HOMEWORK GUIDELINES

Homework is assigned to reinforce and practice learned concepts or to complete class exercises, assignments and projects. Homework teaches essential skills students need to succeed in school and future employment. Homework is one way that parents can maintain a day-to-day connection with their child's education. It is expected that homework be established as a family routine. The practice of nightly reading should be a goal for every student.

We will continue to recognize and celebrate the reading milestones of ALL our students (i.e., 50, 100, 150 and 200 nights) through our Read For The Stars program. When parents and teachers work in an educational partnership, we make a significant difference for our students.
