

**NOTICE OF CITY COUNCIL MEETING**  
**LEXINGTON ROAD TRANSPORTATION PROJECT**  
 Lexington Road (Davenport to University)  
 Meadowvale Road (Lexington to Running Brook)

In 2014, the City of Waterloo plans to resurface Lexington Road between Anndale Road and University Avenue due to the road's deteriorating surface condition. Per the direction of the City's Transportation Master Plan, all road projects provide opportunities to improve the transportation network for all road users (e.g., vehicles, cyclists, pedestrians etc.). Preliminary work was undertaken in 2013 and Public meetings were held in June 2013 and December 2013 to obtain public input.

Design is now near completion, and City staff will be requesting City Council approval of the proposed works for the Lexington Road Transportation Project. The proposed works include:

- Reconstruction of the road pavement from Anndale Road to university Avenue;
- A 3m wide multi-use path on the south side of Lexington Road from Davenport Road to Bridge Street;
- Sidewalk on the south side of Lexington Road from Bridge Street to University Avenue;
- Sidewalk on the east side of Meadowvale Road from Lexington Road to Running Brook Place;
- Median refuge islands on Lexington Road between Anndale Road and University Avenue;
- Left turn lane improvements on Lexington Road between Davenport Road and Dunvegan Drive;
- On-road bike lanes on both sides of Lexington Road from Anndale Road to University Avenue;
- Bike boxes at the Bridge Street and University Avenue intersections with Lexington Road.

Subject to Council approval and final costs, work is scheduled to occur in the 2014 construction season. The City Council meeting details follow:
