

# chrome week

at Moffat Creek P.S.

This past summer we lost our computer lab, and though the WRDSB replaced the computers with Chromebooks and mini iPads, it has been found by staff, students, and administration to not be enough to meet their needs.

## Why do the students need more technology in class?

*“The need for technology in classrooms has been linked directly to student achievement across the province. The more access our students have the more prepared they are for a life outside of Moffat Creek.*

*A group of teachers, administrators and parents have concluded that Moffat Creek requires better access to meet the needs of our students. We would like to purchase Chromebooks to create a mobile computer lab where teachers can borrow enough technology for every member of their class.*

*Chromebooks are versatile machines which allow students to access the world at their desk. Whether researching the rotation of Pluto, checking for proper punctuation in french, preparing a presentation on the amount of rainfall in Halifax or writing a report on spiders, the potential is limitless.*

*Please consider donating to our Chromebook project, our students thank you!”*

As a result, Moffat staff, School Council and students are joining together to coordinate a fundraising effort we like to call “chrome week”.

The goal is to raise **\$8000.00** is to purchase **25 Chromebooks** (laptops) to create a **mobile computer lab** that teachers can borrow to provide technology for every student in the classroom.

**See how you can help...**
