March 19, 2020

Not that long ago I used to go to  
school everyday.

I would pretend to fly rockets  
on my pencil when I was bored.

Now there is this virus that can make people feel sick. We are all staying in our homes until the world feels better.

We are spending lots of time  
together at my house.

We try to eat more meals together because we don't have to rush around as much.

We are reading together more  
too.

There are still times when I feel bored. Then I remember that by staying at home I am being a world superhero.

The more there are superhero  
people who stay at home- the  
more quickly our world will get  
better.

Get better quickly world - we  
love you.
