Remote Learning 1

Grade 4-8 School Level Report

2023-2024

INTRODUCTION TO THE MDI

About this year's Safe Caring and Inclusive School Survey

In 2023-2024 the WRDSB used the Middle Years Development Instrument (MDI) as our Safe Caring and Inclusive School (SCIS) survey. The MDI is a self-report questionnaire that asks children in Grade 4 through 12 about their thoughts, feelings and experiences in school and in the community.

The MDI uses a strengths-based approach to assess five areas of development that are strongly linked to well-being, health and academic achievement. In addition, it focuses on highlighting the protective factors and assets that are known to support and optimize development in middle childhood. These areas are: Social and Emotional Development, Physical Health and Well-being, Connectedness, Use of After School Time and School Experiences. Each of these dimensions is made up of several measures. Each measure is made up of one or more individual questions. The list below illustrates the relationship between the MDI dimensions, measures and questions.

Why are the middle years important?

Experiences in the middle years have critical and long lasting effects. They are powerful predictors of adolescent adjustment and future success. During this time children experience significant cognitive, social and emotional changes that establish their lifelong identity and set the stage for adolescence and adulthood.

The overall health and well-being of your students affects their ability to concentrate and learn, develop and maintain friendships, and make thoughtful decisions. It is important for educators to understand and have information on how their students are doing at this stage of their development.

5 DIMENSIONS OF THE MDI

SOCIAL & EMOTIONAL DEVELOPMENT Measures

Optimism	Absence of Sadness	*Perseverance
Empathy	Absence of Worries	*Assertiveness
Prosocial Behaviour	Self-Regulation (Short-Term)	*Citizenship/Social
Self-Esteem	Self-Regulation (Long-Term)	Responsibility
Happiness	*Responsible Decision-Making	*Self-Awareness
		*Grade 7 Only

PHYSICAL HEALTH AND WELL-BEING Measures

General Health	Meals with Adults at Home	Body Image
Eating Breakfast	Frequency of Good Sleep	

CONNECTEDNESS Measures

Adults at School	Adults at Home	Friendship Intimacy
Adults in the Neighbourhood	Peer Belonging	Important Adults

USE OF AFTER-SCHOOL TIME Measures

Organized Activities	Sports	After-school People/Places
Educational Lessons or Activities	Music or Arts	Children's Wishes and Barriers
Youth Organizations	How Children Spend their Time	

SCHOOL EXPERIENCES Measures

Academic Self-Concept	School Belonging	Future Goals
School Climate	Motivation	Victimization and Bullying

ABOUT THE DATA

This report includes data reported by children in your school who participated in the MDI. It provides data for your school and includes comparisons to WRDSB averages.

Considerations when reviewing MDI data in this report:

- The data in this report focus on children’s self-reported well-being. Most of the data are represented by 3 categories of Well-Being: High, Medium and Low.
- The data in this report have been rounded. Percentage totals for MDI measures may not equal 100
- Many questions on the MDI allow students to provide multiple responses. Percentage totals for these questions will often exceed 100
- Where schools contain fewer than 5 children, the results are suppressed to ensure that individual children cannot be identified.
- In the 2023-2024 School Year, an abbreviated version of the MDI was used that shortened the time required for students to complete the survey. Some of the results on your previous reports are not present here. However, all parts that were required to compute the Asset Indices and Well-Being Index are available.

High Well-Being (Thriving)
Children who are reporting positive responses

Medium to High Well-Being
Children who are reporting neither positive nor negative responses.

Low Well-Being
Children who are reporting negative responses.

SCHOOL YEAR 2023-2024 RESULTS FOR Remote Learning 1

DEMOGRAPHICS FOR Remote Learning 1

Student Population Breakdown

Total School Sample	94	WRDSB Total Sample	13900
---------------------	----	--------------------	-------

Gender Identity

Female/Girl	59%	Male/Boy	34%
-------------	-----	----------	-----

Grade

4	24%	6	36%	7	18%	8	21%
---	-----	---	-----	---	-----	---	-----

Languages Spoken at Home

Arabic	5.3%	Chinese (incl. Mandarin and Cantonese)	
English	76.6%	French	2.1%
Gujarati		Hindi	
Persian (Farsi)	1.1%	Punjabi	1.1%
Spanish	3.2%	Turkish	
Urdu	6.4%	Vietnamese	

Total School Sample: Refers to the total number (#) of children represented in this report. Children are included in the sample if they complete a question and the data are reported.

Gender Identity: Children were provided with 11 options on the gender question including “Prefer not to answer” and a free response. For school reports, only the top 3 responses are presented here, provided there are at least 16 students who selected a given option. In most schools, that only permits 2 to be printed. More fulsome gender data will be provided at the whole board level to permit sufficient data aggregation to protect student privacy.

Languages at Home: Children are able to select more than one language spoken at home.

Other: A limited selection of languages are offered on the MDI questionnaire. The “Other” category gives children an opportunity to enter their own response(s).

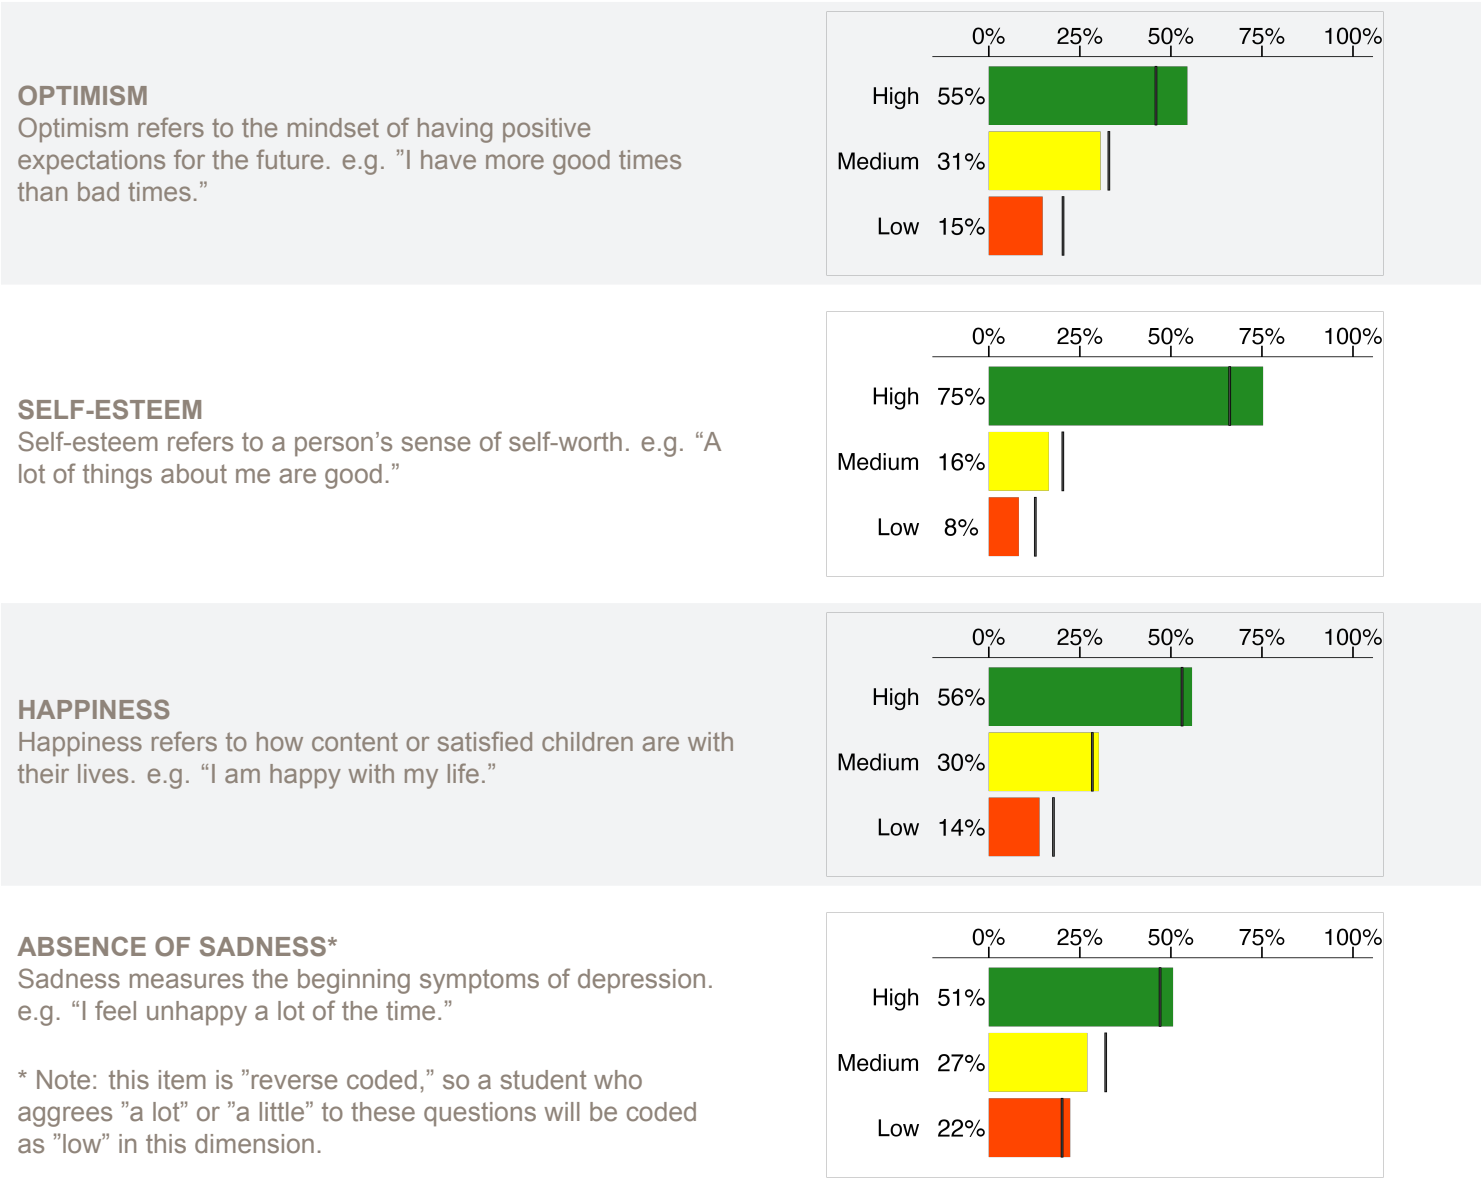

SOCIAL & EMOTIONAL DEVELOPMENT

The development of social and emotional skills, including empathy, optimism and self-esteem, are important for supporting positive mental health during middle childhood and at all ages to follow. These skills help students understand and manage their emotions, build and maintain positive relationships, and regulate their own behaviour. Opportunities to develop social and emotional skills can be created in many supportive environments: at school with teachers and peers, in the home with elders, family or caregivers, and during after-school programs with community members.

PHYSICAL HEALTH & WELL-BEING

Promoting student’s physical health and well-being in the middle years lays the foundation for a healthy life. Students who report feeling healthy are more likely to be engaged in school, have a feeling of connectedness with their teachers, and are less likely to be bullied or bully others. Students benefit from guidance and opportunities that support the development of healthy habits, which they can carry forward into adolescence and adulthood. These habits include regular physical activity, quality sleep and healthy, social meals.

Results for Remote Learning 1

| WRDSB Average

WHAT TIME DO YOU USUALLY GO TO BED DURING THE WEEKDAYS?

Note: May not add to 100% if some students did not answer this question.

CONNECTEDNESS

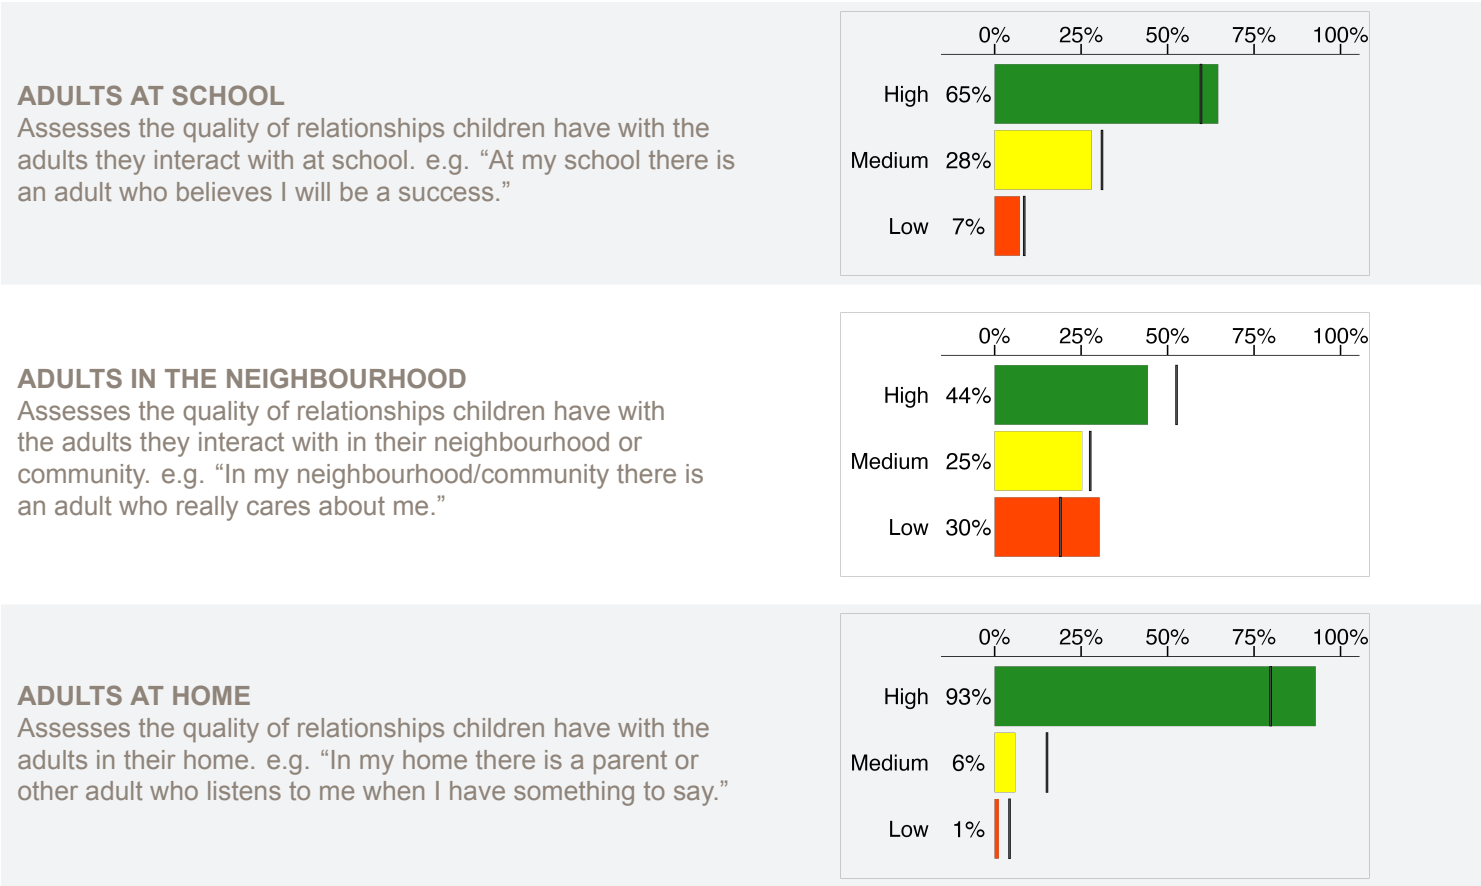

Strong and supportive social connections play an important role in children’s healthy development. Close relationships and a sense of belonging with adults and peers at home, in school, and in the community, can promote positive mental health and minimize risks that may be present in children’s lives.

Having one adult, such as a parent or auntie, an elder or a coach, who cares about them, listens to them and believes in them can make a powerful difference in a child’s life. For children, connectedness to extended family, community, as well as land, language, and culture also play an important role in encouraging a strong and healthy sense of identity.

CONNECTEDNESS WITH ADULTS

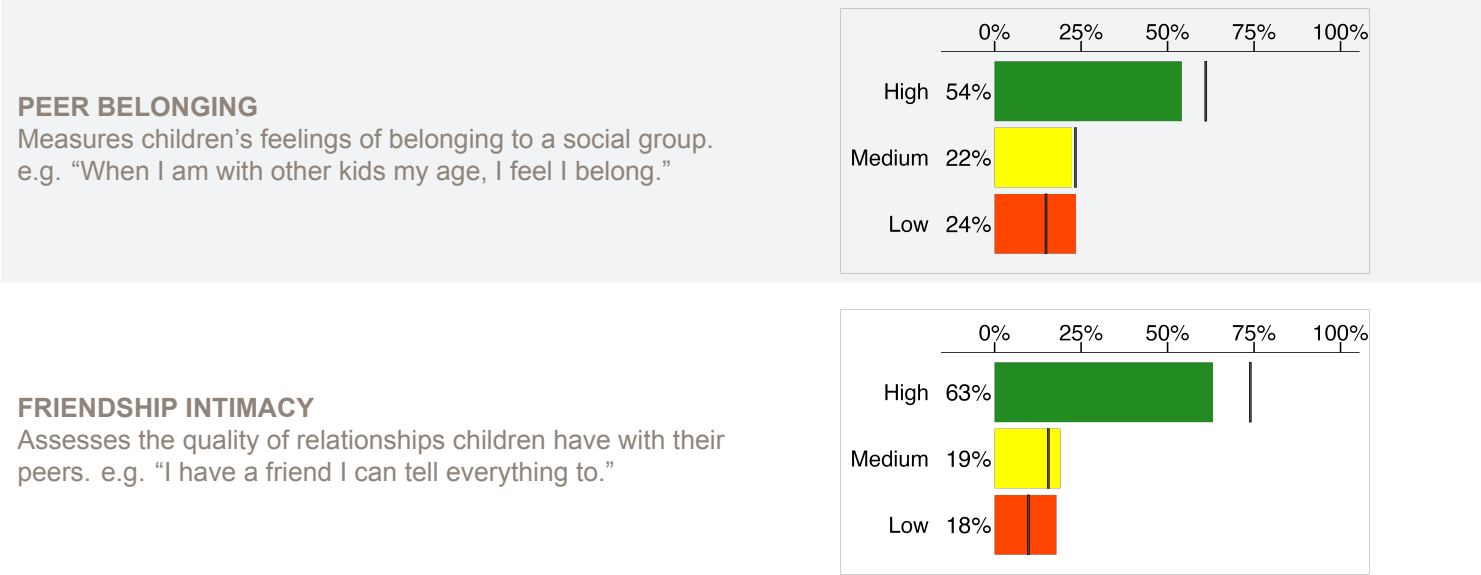

NUMBER OF IMPORTANT ADULTS AT SCHOOL

IN YOUR NEIGHBOURHOOD/COMMUNITY THERE ARE ADULTS WHO
(Percentage of children who responded “very much true”)

CONNECTEDNESS WITH PEERS

USE OF AFTER-SCHOOL TIME

Participation in activities after school provides important developmental experiences for children in their middle years. These activities create a variety of opportunities for children to build relationship skills and gain competencies. Research has consistently found that children who are engaged in after-school activities are more likely to experience greater academic and social success.

How Children Spend Their Time

ANY ORGANIZED ACTIVITY

Children who participated in any after-school activity that was structured and supervised by an adult. (e.g. educational lessons, youth organizations, music or art lessons and sports practice)

EDUCATIONAL LESSONS OR ACTIVITIES

For example: Tutoring, attending a math school, foreign language lessons, or some other academic related activity.

MUSIC OR ART LESSONS

For example: Drawing or painting classes, musical instrument lessons or some other activity related to music or art.

YOUTH ORGANIZATIONS

For example: Scouts, Girl Guides, Boys and Girls Clubs, or some other group organization.

INDIVIDUAL SPORTS (WITH A COACH OR INSTRUCTOR)

For example: Swimming, dance, gymnastics, ice skating, tennis or another individual sport.

TEAM SPORTS (WITH A COACH OR INSTRUCTOR)

For example: Basketball, hockey, soccer, football, or another team sport.

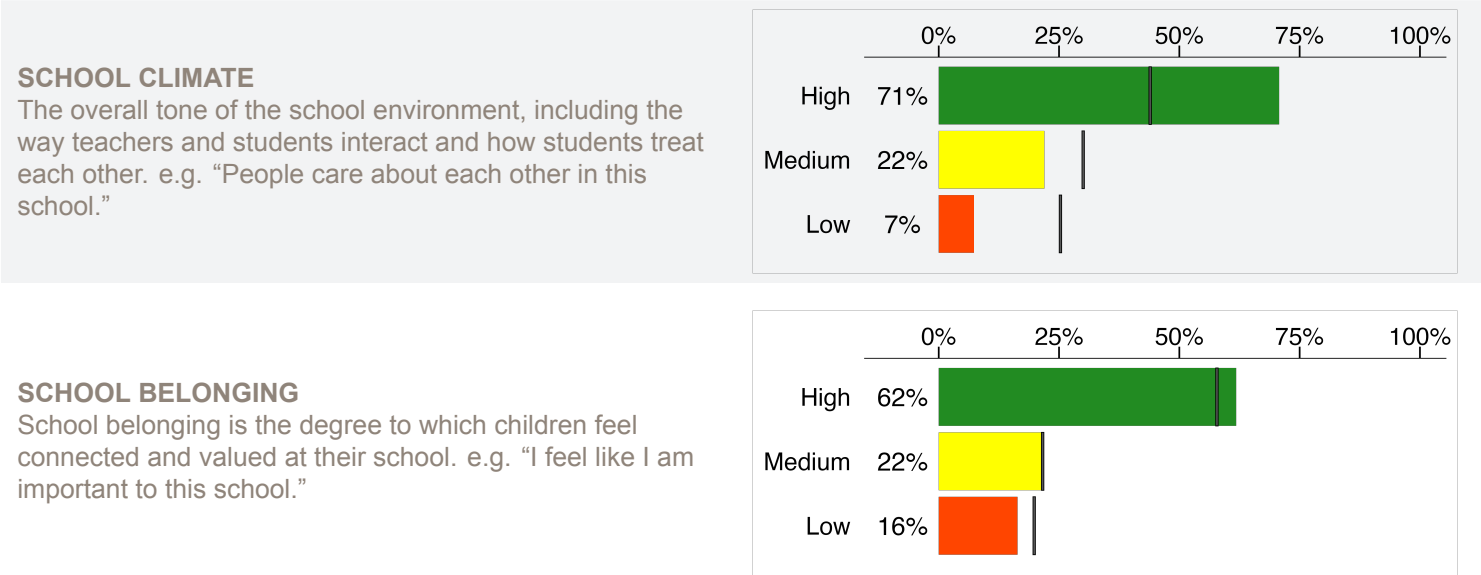

SCHOOL EXPERIENCES

Children’s school experiences are important for their personal well-being and academic success. When children have positive experiences at school they are more likely to believe they have a valued role in the school, feel more engaged in class and achieve higher academic performance. Understanding children’s school experiences improves our ability to cultivate school environments that are safe, caring, and supportive.

VICTIMIZATION AND BULLYING AT SCHOOL

Children are asked: 'During this school year, how often have you been bullied by other students in the following ways?':

CYBER

PHYSICAL

SOCIAL

VERBAL

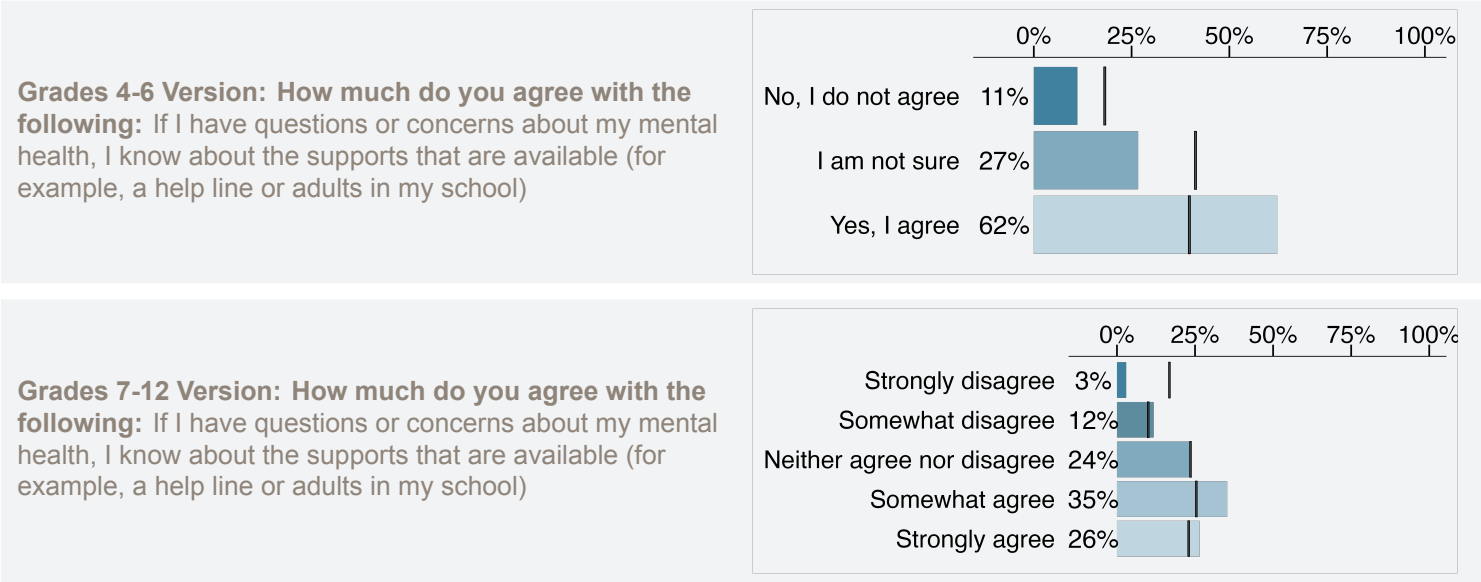

MENTAL HEALTH SUPPORTS

Students’ awareness of mental health supports is crucial, serving as a key protective factor for those facing challenges or struggling with their well-being. Research consistently highlights the significance of mental health supports in promoting resilience among students experiencing low well-being or other difficulties.

WELL-BEING & ASSETS INDICES

Combining select measures from the MDI helps us paint a fuller picture of children’s overall well-being and the assets that contribute to their healthy development. The results for key MDI measures are summarized by two indices. This section of the report focuses on results for the Well-Being Index and the Assets Index.

A measure in the Well-Being Index

A measure in the Assets Index

5 DIMENSIONS OF THE MDI

	SOCIAL & EMOTIONAL DEVELOPMENT Measures Optimism Empathy Prosocial Behaviour Self-Esteem Happiness Absence of Sadness Absense of Worries Self-Regulation (Short-Term) Self-Regulation (Long-Term) *Responsible Decision-Making *Perseverance *Assertiveness *Citizenship/Social Responsibility *Self-Awareness *Grade 7 only		
	PHYSICAL HEALTH AND WELL-BEING Measures General Health Eating Breakfast Meals with Adults at Home Frequency of Good Sleep Body Image		
	CONNECTEDNESS Measures Adults at School Adults in the Neighbourhood Adults at Home Peer Belonging Friendship Intimacy Important Adults		
	USE OF AFTER-SCHOOL TIME Measures Organized Activities • Educational Lessons or Activities • Youth Organizations • Sports • Music or Arts How Children Spend their Time After-school People/Places Children’s Wishes and Barriers		
	SCHOOL EXPERIENCES Measures Academic Self-Concept School Climate School Belonging Motivation Future Goals Victimization and Bullying		

WELL-BEING INDEX

The Well-Being Index consists of measures relating to children’s physical health and social and emotional development that are of importance during the middle years: Optimism, Happiness, Self-Esteem, Absence of Sadness and General Health.

Scores from these five measures are combined and reported by three categories of well-being, providing a holistic summary of children’s mental and physical health.

High Well-Being (Thriving)
Children who are reporting positive responses.

Medium to High Well-Being
Children who are reporting neither positive nor negative responses.

Low Well-Being
Children who are reporting negative responses.

ASSET INDEX

The Assets Index combines MDI measures that highlight four key assets that help to promote children’s positive development and well-being. Assets are positive experiences, relationships or behaviours present in children’s lives. Assets are considered actionable, meaning that schools and communities can focus their efforts in these areas to create the conditions and contexts where children can thrive.

Note: School Experiences are also considered to be an asset that contributes to childrens’ well-being; however, this asset is not reported as part of the Assets Index to prevent the ranking of individual schools or districts. Please refer to the School Climate and Bullying and Victimization measures for data related to this asset.

ASSETS INDEX Percentage of children reporting the presence of an asset
